Subject Index to Volume 10

Acetylcholine, 119–134, 465–485
Acetylcholinesterase, 128, 445–452
Amino acids, actions on flatworm nerve cord, 400
——, effects of on glial and neuroblastoma cells, 31–34
——, effects on spreading depression, 355–362
——, stimulating taste receptors, 210–215
——, transport of, in *Aplysia* neurons, 551–510
Arousal, by food, in *Navanax*, 524, 530
ATP (Adenosine triphosphate), 169, 173, 176
Axonal transport, general, 1–11, 221–235, 489–498, 499–507, 509–516
——, orthograde, 121–135, 558
——, retrograde, 179–194, 557
Axoplasmic flow, 452

Batrachotoxin, 509
Bicuculline, effects of, on flatworm nerve, 401
——, effects of, on reflex in rat, 71
Buccal mass, of *Aplysia*, 13

Calcium,concentration effect on protein synthesis, 603
——, effects of, on protein transport, 603
——, uptake by glial cells, 31–36
——, uptake by neuroblastoma cells, 31–36
Catecholamines, metabolism, 340
——, in nerve fractions, 309
Central motor program, 273
Cholineacetyltransferase, 128–132
Cobalt staining, of motorneurons, 144–146, 150
Colchicine, 556, 592
Culture, of neurons, 535
Curare, 21
"Cyberchron" network, 26
Cyclic AMP, 176
Cyclic GMP, effects on neurons, 478–481
——, in endplate, 445–450
Cytochalasin-B, effects on motor nerve, 240, 241

Decerebration, effects of, in rat, 74
Dopamine β-hydroxylase, distribution of, in density gradients, 296
——, transport of, 566
Dorsal root ganglion, 4

Effectors, of jellyfish, 97
Electrical coupling, between adjacent neurons, 536, 544
Exocytosis, 318

Facilitation, of evoked potentials, 376
——, of junctional potentials, 611

GABA (γ amino butyric acid), 394, 398, 404
Ganglion, abdominal, of *Aplysia*, 455–463, 494, 535
——, buccal, of *Aplysia*, 13–27
——, thoracic, of locust, 41–64, 153–167
Gangliosides, 429–438
Gap junctions, 548
Glial cells, 31–39, 605
Glutamate, 355
Glycine, 400, 553–569

Habituation, of flexor reflex of rat, 67–77, 79–91, 155–166
——, of gill withdrawal reflex in *Aplysia*, 255–269

Identified neuron, L_9, of *Aplysia*, 255, 537–539
——, R_3-R_{14}, of *Aplysia*, 551–570
——, R_{15}, of *Aplysia* duplicated, 326
——, bag cells, of *Aplysia*, 537
——, mechanosensory interneuron, of crayfish, 247
——, motor, of locust, 41–63, 153–167
Inhibition, in nerve cord of flatworm, 384–391
Interneurons, inhibition of activity, in rat, 79–91
——, mechanosensory, in crayfish, 248–253

Junctional potentials, 140–145, 156–163

Locus coeruleus, 338
Locust, serially homologous neurons in, 41–65
Lucifer yellow, 545, 546

Macromolecules, retrograde transport of, 179–195
Magnesium, effects on crustacean neuromuscular junction, 609–613
——, suppression of spreading depression, 357
——, synapses insensitive to, 380
Microtubules, 476, 578

Miniature excitatory junctional potentials, 139
Modulation, of *Aplysia* reflex, 255–269
Motorneurons, ventral horn, 8, 9
Myelinated axons, 591

Neonatal damage, effects of on developmental plasticity, 338–345
Nerve cell clusters, 431
Nerve growth factor, transport of, 184
Neurodepressing hormone, 411–420
Neurofilaments, 476
Nocodazole, antimicrotubule agent, 557
Noradrenaline, organelles storing, 134
——, plasticity of neurons containing, 337–350

Optic tectum, of chick, 433

Peptides, transport of, in *Aplysia*, 489–498, 499–507
Phospodiesterase, effects of an inhibitor of, on nerve cell coupling, 329
Photoresponse, of *Aplysia* neuron, 459
Plexus, in nervous system of flatworm, 369
Postsynaptic potentials, complex, multiple, 17–27
——, simple, 17–27, 112, 143–148
1-Proline, effects on spreading depression, 359
Protein, rapidly transported, in neurons, 4–9, 439
——, S-100, on nerve cell membrane, 489–491
——, translocation of, in brain, 591–606

Quantal content, of synaptic event, 613

Retinula cells, of crayfish, 573–588

Sensitization, of reflex in rat, 83
Septate junctions, 548
Six hydroxydopamine, 340
Spreading depression, in retina, 355–364
Strychnine, effects on reflex in rat, 71
Synaptic polypeptides, of chick brain, 171–177
Synaptosomes, chick, brain, phosphorylation of, 169–177

Taste receptor binding, 210
Taurine, axonal transport of, 221
TEA (tetraethylammonium), 20, 21
Trophic influence, at neuromuscular junction, 441–452

Vesicles, dense core, 314–316
Vestibular system, neuronal operations in, 331
Vinblastine, effects on newly synthesized protein, 592

JOURNAL OF NEUROBIOLOGY

An International Journal

Editor-in-Chief: GRAHAM HOYLE

Department of Biology
College of Arts and Sciences

a Wiley-Interscience Publication
published by JOHN WILEY & SONS

Published bimonthly, one volume per year, by John Wiley & Sons, Inc. Copyright © 1979 by John Wiley & Sons, Inc., 605 Third Avenue, New York, New York 10016. All rights reserved. Reproduction or translation of any part of this work beyond that permitted by Sections 107 or 108 of the 1976 United States Copyright law without the permission of the copyright owner is unlawful.

The code and the copyright notice appearing at the bottom of the first page of an article in this journal indicate the copyright owner's consent that copies of the article may be made for personal or internal use; or for the personal or internal use of specific clients, on the condition that the copier pay for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. The per-copy fee for each article appears after the dollar sign and is to be paid through the Copyright Clearance Center Inc. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Such permission requests and other permission inquiries should be addressed to the publisher.

Subscription price (1980): $65.00 per volume. Postage and handling outside U.S.A.: $11.00. Please allow four weeks for change of address. Back volumes, microfilm, and microfiche available for previous years. Request price list from publisher. Claims for undelivered copies must be made no later than three months following months of publication. Missing copies will be supplied when losses have been sustained in transit and where reserve stock will permit.

Manuscripts should be submitted in triplicate to Dr. Graham Hoyle or to an Associate Editor. Books for review should be sent to Dr. Hoyle. Address all other correspondence to Journals Department, John Wiley & Sons, Inc., 605 Third Avenue, New York, 10016. Second-class postage paid at New York, New York, and at additional mailing offices.

Journal of Neurobiology

Contents

Volume 10, 1979

Issue 1, January 1979

Qualitative Analysis of Proteins Rapidly Transported in Ventral Horn Motoneurons and Bidirectionally from Dorsal Root Ganglia
G. C. Stone and D. L. Wilson 1

Synaptic Connections and Functional Organization in *Aplysia* Buccal Ganglia
L. Fiore and J.-M. Meunier 13

Effects of Amino Acids on Calcium Uptake by Glial and Neuroblastoma Cells
J. Borg, J. Mark, and P. Mandel 31

The Structure and Function of Serially Homologous Leg Motor Neurons in the Locust. I. Anatomy
J. A. Wilson 41

Some Observations on Habituation of the Flexor Reflex in the Rat: The Influence of Strychnine, Bicuculline, Spinal Transection, and Decerebration
J. F. MacDonald and J. A. Pearson 67

Inhibition of Spinal Interneuron Activity by Repeated Cutaneous Stimulation: A Possible Substrate of Flexor Reflex Habituation
J. F. MacDonald and J. A. Pearson 79

Information for Contributors 93

Issue 2, March 1979

Neurobiology of *Polyorchis*. II. Structure of Effector Systems
A. N. Spencer 95

The Intra-axonal Transport of Acetylcholine and Cholinergic Enzymes in Rat Sciatic Nerve During Regeneration After Various Types of Axonal Trauma
P.-O. Heiwall, A. Dahlström, P.-A. Larsson, and S. Bööj .. 119

Motor Innervation of the Pharynx Levator Muscle of the Snail, *Helix Pomatia:* Physiological and Histological Properties
M. Peters 137

The Structure and Function of Serially Homologous Leg Motor Neurons in the Locust. II. Physiology
J. A. Wilson 153

Autophosphorylation of Chick Brain Synaptic Polypeptides. Phosphorylation of Proteins During Incubation of Intact Synaptosomes with $^{32}PO_4$
T. B. Breithaupt and J. A. Babitch 169

Retrograde Axonal Transport of Specific Macromolecules as a Tool for Characterizing Nerve Terminal Membranes
M. Dumas, M. E. Schwab, and H. Thoenen 179
